## Práctica Pr4 Sessions PHP

### Exercise01.php

Crea un formulario que permita gestionar la cantidad de refresco o leche que hay en un supermercado. (3 puntos)

- Se debe mantener el nombre del trabajador que está utilizando la aplicación.
- Se debe poder añadir y quitar leche o refresco seleccionando de una lista
- Se debe controlar que no se pueden quitar mas unidades de las que haya, en ese caso mostrar error.

## Exercise02.php

Crea un php con un array inicial con 3 valores numéricos. (2 puntos)

- Crea un formulario que permita modificar el valor en una posición en concreto.
- Consigue que se mantenga las modificaciones en el array.
- Añade un botón para calcular el valor medio.

pantalla inici

### Modify array saved in session

Position to modify: 0 ▾

New value:

Current array: 10, 20, 30

### Modify array saved in session

Position to modify: 2 ▾

New value: 40

Current array: 10, 20, 30

### Modify array saved in session

Position to modify: 0 ▾

New value:

Current array: 10, 20, 40

### Modify array saved in session

Position to modify: 0 ▾

New value:

Current array: 10, 20, 40

Average: 23.33

## Modify array saved in session

Choose position: 1 ▾

New value: [Default is 0]

### Array:

- Number List: 10, 2, 30

**Changed to 2 in the position 2.**

# Modify array saved in session

### Ejercicio03.php

Crea un código php que permita gestionar una lista de la compra. (5 puntos)

a) Permite asignar un nombre, cantidad y precio a un item. (0,5 puntos)

#### Shopping list

name:

quantity:

price:

name	quantity	price	cost	actions
Total:			0	<input type="button" value="Calculate total"/>

b) Permite añadir un nuevo item. (1 punto)

#### Shopping list

name:

quantity:

price:

Item added properly.

name	quantity	price	cost	actions
vino	2	10	20	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
Total:			0	<input type="button" value="Calculate total"/>

c) Permite editar un item en concreto. (1 punto)

Shopping list

name:   
quantity:   
price:

Item selected properly.

name	quantity	price	cost	actions
vino	2	10	20	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
pan	5	1	5	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
Total:			0	<input type="button" value="Calculate total"/>

click "Edit" para seleccionar valores actuales de lista

Shopping list

name:   
quantity:   
price:

Item updated properly.

name	quantity	price	cost	actions
vino	3	14	42	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
pan	5	1	5	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
Total:			0	<input type="button" value="Calculate total"/>

click "Update" para actualizar valores de lista

d) Permite borrar un item en concreto. (1 punto)

Shopping list

name:   
quantity:   
price:

Item updated properly.

name	quantity	price	cost	actions
vino	3	14	42	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
pan	5	1	5	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
Total:			0	<input type="button" value="Calculate total"/>

Shopping list

name:   
quantity:   
price:

Item deleted properly.

name	quantity	price	cost	actions
vino	3	14	42	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
Total:			0	<input type="button" value="Calculate total"/>

e) Permite almacenar de cada item su coste total (0,5 puntos)

name	quantity	price	cost	actions
vino	3	14	42	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
pollo	1	5	5	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
huevos	12	3	36	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
Total:			0	<input type="button" value="Calculate total"/>

f) Muestra el coste total de la lista. (1 punto)

name	quantity	price	cost	actions
vino	3	14	42	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
pollo	1	5	5	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
huevos	12	3	36	<input type="button" value="Edit"/> <input type="button" value="Delete"/>
Total:			83	<input type="button" value="Calculate total"/>
